FOX Technology Internship Hiring Team
FOX Corporation
New York, NY

October 2, 2026

Dear Hiring Team,

Re: Summer 2027 FOX Technology Internship Program - New York, NY (R50033968)

I am excited to apply for the Summer 2027 FOX Technology Internship Program in New York. I am pursuing a B.S. in Computer Science at the University of California, San Diego, with a 4.0 GPA and an expected graduation date of June 2028. My top areas of interest are Software Engineering, Media Network Engineering, and AI/ML & Emerging Tech. I am drawn to the opportunity to build technology that supports live, on-demand, and digital media experiences across FOX's portfolio.

My projects have given me experience owning software from design through testing and iteration. For Quotaquarium, I built a networked C++ product on an ESP32-S3 that authenticates multiple accounts, retrieves live data over HTTPS, and presents it through an animated touch interface. I implemented concurrent FreeRTOS workers, adaptive polling, rate-limit-aware scheduling, structured logging, and runtime diagnostics to make the system responsive and reliable. I also developed a Python Home Assistant integration using event-driven REST workflows and a Python pipeline for parsing HTML and generating structured ePub files.

FOX's work at the intersection of media and technology is especially compelling to me. Products such as Tubi and FOX One combine large-scale digital delivery, live content, personalization, and product engineering. I would be excited to contribute my experience with Python, Java, C++, Linux, networking, APIs, debugging, and AI-assisted development while learning how FOX engineers build dependable experiences for audiences across platforms.

Beyond technical work, my experience as a Computer Consultant at the Oakland Public Library taught me how to diagnose problems, communicate clearly with people of different technical backgrounds, and remain professional when expectations and constraints are not yet fully defined. I am prepared to work onsite in New York and am available for the full Summer 2027 program. Thank you for considering my application. I would welcome the opportunity to contribute to FOX and learn from its technology teams.

Sincerely,

Zhengyang Yu
