Education

2025 – Jun 2028 **Bachelor of Science in Computer Science**, *University of California, San Diego*, San Diego, CA

Expected Graduation: June 2028; GPA: 4.0/4.0

Relevant Coursework: Systems Programming, Computer Organization, Advanced Data Structures, Design and Analysis of Algorithms

2023 – 2025 **Associate of Science in Computer Science**, *Laney College*, Oakland, CA

Experience

2024–2025 **Computer Consultant**, *Oakland Public Library - Elmhurst Branch*, Oakland, CA

- Diagnosed computer and software failures, reproduced user-reported issues, and resolved problems through systematic troubleshooting.
- Documented solutions and explained technical steps clearly to community members with varied levels of experience.

Projects

2026 **Quotaquarium**, *Personal Project*

- Built a production-style C++ client that retrieves live Codex quota data through authenticated HTTPS APIs and supports multiple accounts, device-code authorization, alerts, and interactive controls.
- Added concurrent workers, adaptive polling, bounded persistent logs, and runtime diagnostics to identify failures across networking, authentication, device state, and rendering while keeping the interface responsive.

2025 **HTML to ePub Converter**, *Personal Project*

- Engineered a Python pipeline with modular HTML parsing, metadata validation, and structured error handling for reliable ePub generation and easier debugging.

2024 **Home Assistant Presence Plugin**, *Personal Project*

- Built a Python integration that converts entry and exit sensor events into real-time room-occupancy state.
- Designed an event-driven REST API workflow with explicit state transitions for dependable automation, testing, and fault isolation.

Skills

Programming Python, C++, Java, C

AI & APIs Codex-assisted development, AI agent workflows, REST APIs, JSON, HTTP/HTTPS, device-code authentication

Reliability Root-cause analysis, software testing, structured logging, runtime diagnostics, defensive error handling

Engineering Data Structures, Algorithms, Object-Oriented Design, Concurrent and Event-Driven Systems

Tools Git, Docker, Linux, VS Code, FreeRTOS, PlatformIO
